

November 25, 2009

Parents and Guardians,

We are pleased to announce that St. Bernard's Elementary has passed the air quality clearance test and our doors are open once again. We are awaiting the written report of this test and will meet as a School Council this week to review the information.

A copy of Pinchin Leblanc Environmental Limited's clearance test results will be posted on the school website for parents. We invite parents to provide their feedback on this matter to any of your council members. Contact information is available on the school website.

Please note that all School Council meetings are available to parents who wish to attend and observe proceedings. Should you wish to communicate your concerns, you must observe protocol and be represented through your members.

Please check your school website frequently, as information and updates will be posted as it becomes available.
